

- Ambulatory surgery is booming business!
- High workflow in a limited period of time
- Well tolerated medical procedures
- Provide good patient satisfaction
- Follow-up assesment

CoZo

A digital health care co-operation platform connecting patients and caretakers that allows quick and safe exchange of medical information:

- ✓ Professional Caretakers
- ✓ GP's (1500)
- ✓ Heath Care institutions (36)
- √ Home-nurses
- ✓ Radiology clinics
- ✓ Laboratories

DPP: Possibilities for the patient

- ➤ Consulting medical examination results
- ➤ Instantly Correct Information
- ➤ Online appointment scheduling
- ➤ Individualized Care Pathway
- ➤ Videocalling whith questions or problems

CoZo: het Collaboratief Zorgplatform

Het Collaboratief Zorgplatform (CoZo) is een digitaal samenwerkingsplatform dat patiënten, zorgverleners en zorginstellingen toelaat om snel en veilig medische gegevens uit te wisselen en te delen. Door te zorgen voor een betere informatiedoorstroming verbetert CoZo het zorgproces.

Het platform is gegroeid vanuit een open visie op de zorg van de toekomst, met respect voor de eigenheid van elke partner en met zorg voor een maximale bescherming van de privacy van de patiënt.

Lees meer over CoZo

Ik ben aangesloten bij CoZo. Mijn behandelende arts kan zo makkelijker mijn onderzoeken opvolgen.

- 1k zoek informatie
- 1 Inloggen op CoZo als patiënt

Nu ik bij CoZo ben aangesloten, ben ik steeds op de hoogte van mijn patiënten en hun lopende behandelingen!

Digital Patient Platform DPP

Digitale sleutel(s) met gebruikersnaam + wachtwoord

Start screen

Digital patient platform: expansion

- > Start in oncology
- > Study in diabetes
- Expansion to maternity: expecting mothers are able to see/show their ultrasound images/movies
- ➤ Evolution to AMBULATORY CARE adjusted to a specific surgical care pathway new surgical procedures

The Digital Onco-Platform (DOP): e-Health support for patient

▶ Origin

- **▶** Importance of patient participation
- ▶ Need of integrated care
- **▶** Care of onco patient is complex
- **▶** Increase of ambulatory patients
- ▶ Importance of self-management and empowerment
- ▶ Need of good follow-up of adverse effects
- Need of reliable information

...

Dpp: Day Clinic Care Path: study

- Orthopedics: Arthroscopic knee operations: basic/ ACL
- > ENT: Sinusoperation: Fess/ cohlear implant
- > ENT: Ear operations specific to evaluate comfort in DCC
- Urology: SNS neurostimulator

Met wie contact opnemen bij problemen?

Je kan de polikliniek orthopedie bereiken van 8 tot 17u tijdens weekdagen

- Telefonisch: 09 332 22 51
- Ingang 50 (gebouw P6), route 740

Je contact opnemen met de Chirurgisch dagziekenhuis van 7u tot 19u tijdens weekdagen

- Telefonisch 09 332 53 84
- # Email: <u>Chir.dagziekenhuis@uzgent.be</u>
- Ingang 56 (gebouw B2), route 560

In geval van nood kan u buiten de kantooruren (van 19u tot 7u) contact opnemen met de Post Anesthesie Care Unit (PACU) op het nummer 09 332 63 00 of met uw huisarts!

DPP: Day Clinic Care Path: goals

Ammenwerth E, Schnell-Inderst P, Hoerbst A.
The impact of electronic patient portals on patient care: a systematic review of controlled trials. *J Med Internet Res* 2012; **14**: e162

At-home monitoring

- Younger patients more often have mobile telephone
- Prefer responding to a mobile app
- Although
 - ▶ 53% patients used the app more than 13 times of 15 possible
- Feedback to the patient to motivate
- Patient training and caregiver participation

Warren-Stomberg M, Jacobsson J, Brattwall M, At-home monitoring after surgery/anaesthesia - a challenge. *J Eval Clin Pract* 2016; **22**: 882-6

Evaluation of quality of recovery

- Day case is expanding
- More patients for more complex procedures
- Ability to resume daily activities
- ▶ How to asses ?
 - ▶ Telephone calls
 - Paper questionnaires
 - ▶ Web based questionnaire: The QoR-15

Jones DT et al.

Effectiveness of postoperative follow-up telephone for patients who underwent adenotonsillectomy.

Arch Otolaryngol Head Neck Surg 2007; 133: 1091-5

Stark PA et al.

Development and psychometric evaluation of a postoperative quality of recovery score

Anesthesiology 2013; 118: 1332-40

Chazapis M et al.

Measuring quality of recovery-15 after day case surgery.

Br J Anaesth 2016; 116: 241-8

Problems with designing patient portals

- Patient engagement (low use)
 - Concerns about confidentiality
 - Not recognize the usefullness
 - Lack of user friendliness
 - Lack of digital access and/or digital health literacy
- Health service provider engagement
 - Fear of increase/disruption of workload
 - Inadequate compensation (remuneration)
 - Concern of lacking technical skills
 - Liability (breached privacy negative patient behaviour)

Otte-Trojel T et al.

What do we know about developing patient portals? a systematic literature review. *J Am Med Inform Assoc* 2016; **23**: e162-8

extra's for the caretaker

- CoZo videoconference (on invitation of the health care provider)
- > DPP integration in patient file
- Individual care path (information, steps, questionnaires, forms,...)
- Notification when activity in DPP mailbox
- Extraction patient self reported data (benchmark)

Conclusion

- ▶ Enables the patient to share information with health care workers
- ▶ Enables information sharing between health care workers, hospitals
- Creates mobile bi-directional communication
- Endorsement of the entire ambulatory pathway
- Cave: information overload
- Beware of the personal health record paradox: high consumer interest and growing availability vs relatively low adoption
